SQL Programming

- **Data Retrieval**:

    Query to get total expenses per category:

    ```
    SELECT Category, SUM(Amount) AS Total_Spent
    FROM myexpenses1_cleaned
    GROUP BY Category;
    ```

    Query to get daily spending habits:

    ```
    SELECT Date, SUM(Amount) AS Daily_Total
    FROM myexpenses1_cleaned
    GROUP BY Date;
    ```

- **Data Analysis**:

    Query to identify the most frequent spending categories:

    ```
    SELECT Category, COUNT(*) AS Frequency
    FROM myexpenses1_cleaned
    GROUP BY Category
    ORDER BY Frequency DESC;
    ```

    Query to find the average spending amount per day:

    ```
    SELECT day, AVG(Amount) AS Average_Spent
    FROM myexpenses1_cleaned
    GROUP BY day;
    ```
